Page 2Listing of Claims

The listing below comprises the current set of claims after any amendments thereto by this paper:

1 (Previously Presented). A tote bag assembly comprising:

a primary tote bag having at least one handle affixed thereto;

a secondary tote bag having at least one handle affixed thereto;

the secondary tote bag being in a rolled up condition, and the primary tote bag being in a rolled up condition so as to encompass the rolled up secondary tote bag; and

the primary tote bag having a single strap affixed thereto so as to be mediate of the handle, and the single strap being attachable to itself, the single strap being in either:

a secure condition wherein the single strap encircles the rolled up primary tote bag and the rolled up secondary tote bag and the single strap being attached to itself so as to exclusively maintain the primary tote bag and secondary tote bag in the rolled up condition; or

an unsecure condition wherein the strap is not attached to itself.

2. (Original) The tote bag assembly of claim 1 wherein there are a plurality of secondary bags.

3. (Original) The tote bag assembly of claim 1 wherein the handles of the primary tote bag project from the assembly of the rolled up primary tote bag and the secondary tote bag in a rolled up condition.

4. (Original) The tote bag assembly of claim 1 wherein the primary tote bag presents an exterior surface that has at least one pocket, and the pocket being accessible when the primary tote bag and the secondary tote bag are in a rolled up condition.

5. (Currently Amended) The tote bag assembly of claim 4 wherein the primary tote bag may be in an unrolled condition, and the pocket being accessible when the primary tote bag is in an unrolled up condition.

6. (Original) The tote bag of claim 4 wherein the pocket includes a closable flap.

7. (Original) The tote bag assembly of claim 1 wherein the primary tote bag is made from a pliable material.

8. (Original) The tote bag assembly of claim 1 wherein the secondary tote bag is made from a pliable material.

9. (Previously Presented) A tote bag assembly of a primary tote bag and at least one secondary tote bag, the assembly comprising:

a primary tote bag defining a top opening, the primary tote bag being capable of being in an expanded condition wherein the primary tote bag defines an interior volume that is accessible through the top opening, said primary tote bag being capable of being in a collapsed condition wherein the primary tote bag does not define an interior volume;

the primary tote bag further including a single strap that is attachable to itself;

a secondary tote bag defining a top opening, the secondary tote bag being capable of being in an expanded condition wherein the secondary tote bag defines an interior volume that is accessible through the top opening, said secondary tote bag being capable of being in a collapsed condition wherein the secondary tote bag does not define an interior volume;

the tote bag assembly being capable of being placed in a portable condition wherein the primary tote bag is collapsed and encircles the collapsed secondary tote bag in a collapsed condition wherein the strap encircles the assembly of the primary tote bag and the

secondary tote bag and is secured to itself so as to exclusively maintain the primary tote bag about the secondary tote bag.

10. (Original) The tote bag assembly of claim 9 wherein the primary tote bag includes handles.

11. (Original) The tote bag assembly of claim 10 wherein the secondary tote bag includes handles.

12. (Original) The tote bag assembly of claim 9 wherein the secondary tote bag is collapsed so as to be in rolled up configuration.

13. (Original) The tote bag assembly of claim 12 wherein the primary tote bag is collapsed so as to be rolled up and encircling the rolled up secondary tote bag.

14. (Original) The tote bag assembly of claim 9 wherein the primary tote bag presents an exterior surface that has at least one pocket, and the pocket being accessible when the primary tote bag and the secondary tote bag are in a collapsed condition.

15. (Original) The tote bag assembly of claim 9 wherein the primary tote bag is made from a pliable material.

16. (Original) The tote bag assembly of claim 9 wherein the secondary tote bag is made from a pliable material.

17. (Previously Presented) A tote bag assembly comprising:

a primary tote bag having at least one handle affixed thereto;

a secondary tote bag having at least one handle affixed thereto;

the secondary tote bag being in a rolled up condition, and the primary tote bag being in a rolled up condition so as to encompass the rolled up secondary tote bag; and
